The pilot is aware of dimensions of the runways, published circuits, position and height of obstacles. He is the only responsible for safe flight operations and calculation of proper distances for take off – landing runs, according to aircraft manual.

WARNING! During summertime (i.e.: June, July, August) for safety reasons (due to high temperature and strong sea breeze) to avoid tricky landings, the airfield is closed to landing aircrafts from 11.00 a.m. to 6.00 p.m. For this reasons pilots must plan their arrival early in the morning or late in the afternoon.

A briefing with the airfield personnel is mandatory prior of arrival.
